Gabriel Rodriguez

Software Engineer

SUMMARY

Proven track record of delivering quality products, maintaining great client communication, managing project scope and deliverables. Seeking a challenging role where I can develop innovative solutions, collaborate with a supportive team, and make a positive impact on projects and the community while growing professionally.

WORK EXPERIENCE

Software Engineer at 100devs, Los Angeles, CA

July 2020 — Present

- Used expertise in web development to build semantically structured full-stack applications
- Leveraged knowledge of semantic structures to build high-quality web applications
- Demonstrated proficiency in agile project development using SCRUM methodology

Recent Projects:

Papercuts (Fullstack Web App) – A fullstack social media application that aims to connect readers around the world. Users can create accounts, join virtual bookclubs, and discuss topics on the book they are currently reading. Application makes use of Node, Express, MongoDB, JavaScript, CSS, and HTML.

Steam Game Tracker (Fullstack Web App) – A fullstack application that makes use of Steam Web API. Allows users to track individual tasks for each game in their steam library through the use of Node, Express, Steam authentication, MongoDB, JavaScript, CSS, and HTML.

Symphony of Birds (Fullstack React Web App) – A React application that allows users to create music with birds calls! The app incorporates the Xeno Canto API and a Google custom search engine. Uses a React frontend and a proxy API backend incorporating API caching and rate limiting.

Other Projects: Frontend Web App for Resturant focused on ease of use, fully customizable sound board for Content Creators, and many more…

GabrielDevelops Web Solutions | Los Angeles County

February 2021 — Present

- Website development tailored to client needs using JavaScript, CSS and HTML, including integration with POS systems.
- Preparing multiple website designs and options for client approval prior to initiating build to ensure client satisfaction with end project.
- Accurately determining project scope, timeline, and specifications so that contractual agreements are accurate and clear.
- Maintaining transparent and continuous communications and status update to clients throughout the project duration.

VOLUNTEERING

Humanitarian Outreach for Migrant Emotional Health (H.O.M.E.) | Remote

- Improved website usability for end-users through effective use of markup languages
- Used expertise in web development to ensure that the application was flexible and customizable
- Used problem-solving and communication skills to ensure that solutions met the needs of the organization
